Art Unit: 3618

DETAILED ACTION

Claims 1-4 and 6-20 have been examined. Claim 5 has been canceled by Applicant.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 – 4 and 13 – 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's disclosure in view of Abkowitz et al. (6,318,738).

Applicant's disclosure states that the following physical structures are "...conventional and are well known to those skilled in the art":

- a blade body having an ice contacting bottom edge (Fig. 1, item 30);
- said blade body having a structure for engaging a blade holder (Fig. 2, item 34);
- said bottom edge having opposed corners that are sharpened (Fig. 3);
- said blade holder being connected to a boot (Fig. 1).

Abkowitz discloses titanium composite skate blades comprising:

a titanium material blade, defined as any of the following: pure titanium, titanium
 alloys, or titanium matrix composites (column 2, lines 41 – 44).

Applicant has chosen "Type 60 Nitinol" as the material of choice for his invention which can be included under the category of titanium alloys. Applicant lists many

Art Unit: 3618

standard physical properties for "Type 60 Nitinol" within claims 1-4 and 13-20. Each material selected would provide differing physical properties, as these properties are dependent upon the physical and chemical structure of each individual material. It would have been obvious to one of ordinary skill in the art at the time of applicant's invention to combine the old and well known blade structure with the titanium material of Abkowitz in order to provide improved strength, corrosion resistance, wear resistance and reduced weight (column 1, lines 59-62).

Allowable Subject Matter

Claims 6 – 12 are allowed.

Response to Arguments

Applicant's arguments filed 19 March 2007 have been fully considered but they are not persuasive.

Applicant states, "...Applicant submitted a Declaration under Rule 132 by Susan Buchanan, President of Triumph Sport, Inc., licensee of this Application...Declaration is powerful evidence refuting the Examiner's conclusion that the use of 60 Nitinol would be obvious to a person of ordinary skill in the art for use in skate blades...Abkowitz specifies skate blade materials made of a titanium alloy which is reinforced by a hard constituent...specifically mentions an alloy of titanium, aluminum and vanadium with

titanium carbide particles dispersed therein...Abkowitz does not disclose or suggest the use of 60 Nitinol as a skate blade material..."

The Office appreciates the information provided by Ms. Buchanan, however, Abkowitz specifically and directly states that titanium alloys are appropriate materials for use in skate blades (as noted above, column 2, lines 41 – 44). This direct statement of applicability would lead one of ordinary skill in the art to consider and potentially pursue the use of a titanium alloy, such as one of the various formulations of Nitinol, in the construction of a skate blade. While Applicant further discusses physical properties and economic concerns that may apply to the use of 60 Nitinol, one cannot disregard the direct suggestion by Abkowitz to investigate the use of titanium and titanium alloys in the manufacture of skate blades.

For this reason, the rejections stand.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Buehler et al. (3,174,851) disclose nickel-base alloys;
- Sahatjian (4,909,510) discloses a ports racquet netting;
- Murai (4,952,044) discloses a metallic eyeglass frame and method for making the same;

 Wood (5,776,214) discloses a method for making abrasive grain and abrasive articles;

- Carpenter et al. (6,149,742) disclose a process for conditioning shape memory alloys;
- Johnson et al. (6,266,914) disclose spinner-type fishing lures and wire and cable fishing leaders.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John D. Walters whose telephone number is (571) 272- 8269. The examiner can normally be reached on Monday - Friday, 8am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christopher Ellis can be reached on (571) 272-6914. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
